

## Kolb Road: Connection to Sabino Canyon Road Comment Transcription

**Public Meeting**  
**Wednesday, June 23, 2010**  
**Van Horne Elementary School**

<b>Do you have any suggestions to help make this a better project?</b>	<b>Please provide any other general comments you have about this project:</b>
I think this project would be better if it also contained an alternate route to keep traffic that is north of Grant Road a way to travel east without having to come down to Tanque Verde Road. Continuing Cloud Road on Snyder so that cars could go east would cut down on a lot of traffic on Sabino Canyon Road. I know that no one wants to address this problem, but it needs to happen!	
The residents of Pantano II Townhomes would like to have a meeting regarding the preference of Malaga Road as our access or no access on Malaga Road using Crestline Drive.	
Put sound walls up from Cloud Road to Tanque Verde Road (or close to) on Sabino Canyon Road.	
Aggressive and public mitigation strategy for transplanting or replacing the mature trees along the new roadway.	
Put a rubberized topcoat on Sabino Canyon Road between Tanque Verde Road and Skyline Drive.	
Sounds good to me.	Should help greatly.
	I am very pleased. Thanks for all the research, planning and good luck with the execution. I can't wait till it is done!
Eliminate traffic lights at new bridge at Kolb Road and Sabino Canyon Road by adding an overpass south bound from Sabino Canyon Road to Kolb Road.	Hope it relieves traffic stoppage on Tanque Verde Road east as well as west between Kolb Road/Grant Road and Sabino Canyon north bound.
You might want to put signs up on Kolb Road and also Sabino Canyon Road to prohibit engine breaking, which big trucks use a lot to come to a stop or slow down. Engine breaking is very noisy.	
Yes, this project is not going to relieve the bottleneck at Tanque Verde Road and Sabino Canyon Road. The financial resources would be better used at this intersection or more accurately by continuing River Road or Sunrise Drive out east past Sabino Canyon Road.	It seems that all the promises and assurances made a few years back (when the Udall west entrance was introduced) have been forgotten. The neighborhood will become more vulnerable as it is exposed with additional access points directly opposite each street. Will there be additional potholes?
Yes - if your aim is to minimize the traffic load at Tanque Verde Road and Sabino Canyon Road, stop and think - folks going south on Sabino Canyon Road are turning east and west. Right so far? These folks are trying to get to the west and southeast part of town. Solution, connect River Road and Sunrise Drive to Catalina Highway and watch the traffic count at Sabino Canyon Road and Tanque Verde Road go way down. Or, watch the area of Speedway - Kolb gets way too busy which just creates another problem.

**Public Meeting**  
**Wednesday, June 23, 2010**  
**Van Horne Elementary School**

Do you have any suggestions to help make this a better project?	Please provide any other general comments you have about this project:
<p>Don't want lights shinning into my neighborhood. Put in a big wall on Kolb Road. As the bridge comes across onto Kolb Road the lights will shine into Dorado Country Club Estates as the bridge comes over the wash. As the bridge drops down to match the elevation of Kolb Road.</p>	<p>I am going to get together with residents of Dorado Country Club Estates to inform them about the light issue. We will need a side elevation showing the scope of the bridge and the line of the car lights to see if the lights go over the existing wall on the west side of Kolb Road. (Right into the Dorado Homes.)</p>
